

SAI ANANYA GAJJALA

Full-Stack Developer and AI-ML Enthusiast

☎ +919046359498 ✉ g.ananya0206@gmail.com 💻 LinkedIn 🌐 GitHub 📍 Hyderabad, India

PROFESSIONAL SUMMARY

Computer Science Engineering student at Anurag University focused on transforming ideas into intelligent products and scalable digital experiences. Skilled in architecting AI-powered applications, designing robust backend infrastructures, and building seamless full-stack solutions

WORK EXPERIENCES

Full-Stack Developer | Internship

Feb 2026 - Present
On-site • Hyderabad

WiseAcad by SuntekCorp

- Architected a full-stack **Hospital Management System** with **15+ APIs** and **10+ modules**, streamlining clinical workflows and reducing administrative processing time by **20%**.
- Engineered **20+ React.js** components and dashboards with **JWT/RBAC**, improving **user experience by 25%** while ensuring **100%** data security compliance.
- Optimized database operations and resolved **30+** critical bugs, reducing server response latency by **15%** to improve system reliability.
- Spearheaded **Agile development** and code reviews for **10+** feature enhancements, accelerating the sprint deployment lifecycle by **30%**.

Technologies / Skills Used : MongoDB, Express, React, Node.js, Tailwind CSS

PROJECTS

MediCare+ | Hospital Management System | 🌐 Github 🌐 Website

Apr 2026 - Jun 2026

Full Stack Developer

- Engineered a full-stack Hospital Management System using **MongoDB, Express.js, React.js, Node.js**, featuring **3** role-based portals, **JWT authentication**, and secure access control across **20+** protected routes.
- Architected and integrated **15+ RESTful APIs** using Node.js, Express.js, **Mongoose**, and **JWT**.
- Implemented **10+** healthcare modules for appointment scheduling, **patient records**, prescription generation, doctor management, and **medical history tracking**.
- Engineered **20+** responsive UI components with **React.js** and **Axios**, while integrating **Cloudinary, Multer**, and **Nodemailer** for file storage and automated email notifications.

Technologies / Tools Used : Mongoose, JWT, Axios, Multer, Cloudinary, Git, GitHub, Nodemailer

AI Resume Analyzer & Optimizer | 🌐 Github 🌐 Website

May 2026 - Jun 2026

Full Stack Developer

- Engineered an AI-powered Resume Analyzer supporting PDF/DOC/DOCX uploads up to **5 MB**, performing **ATS scoring, job matching, grammar checks, 10+** formatting validations, and highlighting strengths and improvement areas.
- Integrated **Groq API** to perform **15+ AI analyses**, including **keyword extraction, ATS checks, missing section detection, and industry skill recommendations**.
- Built an **AI Resume Optimizer** that enhances **4** resume sections with ATS-friendly rewriting, side-by-side comparison, version history, and **PDF/DOCX export**.
- Implemented an **AI Mock Interview** module generating **role-specific questions** and **STAR-based answers**.

Technologies / Tools Used : MongoDB Atlas, JWT, Groq API, PDF-Parse, Chart.js, Render, Vercel

Intelli-Credit – AI-Powered Credit Appraisal Engine | 🌐 Github

Feb 2026 - Mar 2026

AI Engineer / System Architect

- Developed an **AI-driven system** to automate corporate credit appraisal by extracting and analyzing financial data thereby reducing manual analysis time by **70%**.
- Utilized Document parsing and **NLP pipelines** to structure financial information from unstructured reports with **~92% accuracy**.
- Integrated risk evaluation using credit assessment frameworks (**5 Cs of Credit**) and XGBoost to flag financial anomalies with a **15%** lower false-positive rate than baseline models.
- Built a research automation module to scan public sources (NCLT, SEBI, litigation records) and flag potential regulatory and reputational risks across **1,000+** public data points.

Technologies / Tools Used : Python, NLP, gpt-4o-mini, pdfplumber, XGBoost

DhvaniSense | Voice Authenticity Intelligence System | 🌐 Github

Dec 2025 - Feb 2026

Machine Learning Engineer / Backend Developer

- Developed a **Deep Learning pipeline** using a fine-tuned **Wav2Vec2 architecture** to differentiate between human and AI-generated speech with **~98% accuracy**.
- Curated a multilingual dataset of human and synthetic audio across **5 languages** with **10 distinct voice profiles**.
- Built a high-performance backend using **FastAPI** and **Uvicorn** (response latency **<200ms**), secured with API Key authentication.
- Deployed the **17GB model** on **Google Cloud Platform** using **Compute Engine VMs** for real-time AI-Voice Detection.

Technologies / Tools Used : PyTorch, Wav2Vec2, Librosa, FastAPI, Uvicorn

DINov2 Off-Road Segmentation System | 🌐 Github

Nov 2025 - Jan 2026

Full-Stack AI Developer

- Designed, trained, and optimized **Computer Vision models** for **terrain classification**, improving model accuracy by **18%** over standard **CNN baselines** through architecture refinement and **feature engineering**.
- Implemented a computationally efficient **semantic segmentation** network for Edge AI applications, achieving **30+ FPS** real-time inference on CPU-based **embedded systems** without GPU dependency.
- Developed scalable data engineering pipelines for large-scale synthetic datasets, including **data preprocessing, data augmentation, annotation management**, and environment-specific configuration for autonomous navigation experiments.

Technologies / Tools Used : Python, PyTorch, DINOv2 (ViT), OpenCV, Cond

SKILLS

Programming Languages :

Java, JavaScript, Python, C, SQL

Frameworks & Libraries :

React.js, PyTorch, Pandas, NumPy, FastAPI, Flask, Node.js, Express, Tailwind CSS

Tools & Platforms :

Git, GitHub, VS Code, Postman, Figma, Google Cloud Platform (GCP), Conda, Docker, ChatGPT, Claude, Gemini, Grok

Databases :

MySQL, MongoDB

Soft Skills :

Communication, Leadership, Problem Solving, Teamwork, Decision Making, Enthusiasm, Versatility

Languages :

English, Hindi, Telugu

EDUCATIONS

Anurag University Hyderabad	Aug 2024
<i>B.Tech in Computer Science and Engineering</i>	<i>CGPA : 9.68</i>
S.K.S. Public School (CBSE Board) West Bengal, India	Apr 2023 - Mar 2024
<i>Class-XII (MPC)</i>	<i>Percentage : 85.8%</i>

AWARDS & ACHIEVEMENTS

Finalist at India-AI Impact Summit	Feb 2026
<i>HCL GUVI</i>	
Recognized as a top 2% national finalist for developing an AI-Voice Detection API System. [Certificate]	
2nd Runner-up - GENAI Forge hackathon	Feb 2026
<i>NASSCOM</i>	
Built a Full-Stack Movie-Script generating Web Application [Certificate]	
Runner Up at a UI/UX hackathon	Aug 2025
<i>Anurag University</i>	
Created an interactive UI showcasing bakery highlights & featured products using Figma. [Certificate]	
Elite+Gold Certification from NPTEL in Programming In Java	Dec 2025
<i>NPTEL</i>	
Consolidated score of 94%. [Certificate]
